

Glue Gun Containers

WHAT'S NEEDED

Westcott Hot Glue Gun and Glue Sticks

Glass containers (or any container that can be painted)

Spray paint (or acrylic paint)

STEPS

STEP ONE

Plug in your Glue Gun and wait for it to heat up. It turns red when heated so that will tell you.

STEP TWO

Using your Hot Glue Gun, draw on your preferred design. You can draw anything from designs to names, really just have fun with this. Wait for the glue to dry and get rid of the tiny strings of the hot glue.

STEP THREE

Spray paint your vase in your preferred color and your design will literally pop! Wait for the paint to dry and your containers are good for use!
